KIT PHUNG

Software Developer

Graduated in full-stack development and passionate about creating innovative solutions. With a solid foundation in both frontend and backend technologies, including HTML, CSS, JavaScript, and Node.js, I excel in working independently as well as in a team environment. I am eager to kick-start my career and contribute to exciting projects. I am ambitious, quick to learn, and driven to grow into a skilled developer. With my technical expertise and enthusiasm for problem-solving, I am ready to take on new challenges and be an asset to the company's success and growth.

WORK EXPERIENCE

Iwap LIA 2

2023-04-24/2023-06-13

- I completed an internship at Iwap, where I contributed to the development of a mobile application. My responsibilities included writing the code for the login and registration systems. The project utilized React Native for the frontend, Node.js with Express for the backend, and MongoDB as the database.

Renoveta LIA

2022-04-18 / 2022-05-20

- I completed an internship at Renoveta, where I was part of a team that developed and deployed their website, which is still in use today. React.js was used for the frontend.

RP Frukt Hässleholm

2019 - 2021

- At the fruit and vegetable warehouse, I was responsible for managing deliveries, sorting and packing products, and maintaining a safe work environment. My work enhanced my ability to operate efficiently in fast-paced environments with a high level of accuracy.

Scania Södertälje

2007 - 2015

- Assembled various components for gearboxes.
- Responsible for improving quality and work processes.
- Implemented enhancements that sped up the work and reduced errors.
- Collaborated with different teams to ensure everything was done according to regulations and specifications.
